Professional Summary

Third-year Computer Science student at Amrita Vishwa Vidyapeetham with hands-on experience in full-stack web development, machine learning, and data-driven software projects. Proficient in Python, Java, JavaScript, SQL, Flask, and FastAPI, with a strong interest in software engineering and building scalable applications to solve real world problems.

Education

Amrita Vishwa Vidyapeetham, Bengaluru — **Expected August 2028**
B.Tech in Computer Science and Engineering — CGPA: **9.11/10**

The Amaatra Academy, Bengaluru — **2024**
CBSE - Class XII — **90.4%**

Cambridge Public School, Bengaluru — **2022**
ICSE - Class X — **95.6%**

Technical Skills

Programming Languages: Python, Java, C, JavaScript, SQL
Web Technologies: HTML, CSS, JavaScript
Frameworks: Flask, FastAPI, REST APIs
Machine Learning: Scikit-Learn, Pandas, NumPy, Matplotlib, Plotly
Databases: SQLite, MySQL
Developer Tools: Git, GitHub, VS Code
Deployment: Render

Soft Skills

Problem Solving • Team Collaboration • Communication • Analytical Thinking • Adaptability

Projects

Hybrid AQI Monitoring & Sensor Optimization — Python, FastAPI, Machine Learning, JavaScript, GeoJSON

- Collaborated in testing and validating a hybrid air quality monitoring platform integrating AQI, traffic, and urbanization data.
- Performed functional and API testing to verify backend services, frontend workflows, and data consistency across modules.
- Prepared technical documentation covering project setup, testing procedures, and feature specifications to improve maintainability.

Student Performance Predictor — Python, Flask, SQLite, Scikit-Learn, Plotly

- Developed and deployed a full-stack machine learning web application to predict student performance using Flask and Scikit-Learn.
- Implemented secure user authentication with password hashing and session management using SQLite.
- Designed an interactive analytics dashboard using Plotly to visualize prediction trends and academic performance.
- Integrated persistent prediction history to enable users to review previous results and insights.

PotholeRisk – Bengaluru Dynamic Risk Engine — Python, FastAPI, Bayesian Networks

- Developed an AI-based road accident risk prediction system using Dynamic Bayesian Networks to estimate accident probability.
- Integrated pothole density, weather conditions, visibility, and traffic flow into a probabilistic risk assessment model.
- Built a modular FastAPI backend and interactive dashboard for visualizing road-segment risk levels.

Virtual Museum Tour — HTML, CSS, JavaScript

- Designed a responsive virtual museum website with interactive navigation and modern UI.

Certifications

- **Software Engineering Job Simulation** – JPMorgan Chase & Co. (Jul 2026)
- **Python** – Kaggle Learn (Feb 2026)
- **Generative AI in Action** – IBM SkillsBuild (Feb 2026)

Achievements

- **Secured 5th Place** out of 80 teams in "The Night Shift" Startathon organized by ACE and AMAL Club, Amrita Vishwa Vidyapeetham (2025).
- Participant, **Guidewire DEVTrails University Hackathon 2026**, organized in partnership with EY and the National Insurance Academy.
- Participant, **Hack Your Life**, Dastaan 2025 National Level Multifest, Amrita Vishwa Vidyapeetham.
